	Test Name:	Canvas Mobile Application Test (starting from not logged in)				
	Scenario/Purpose:	To try to find bugs or things to be improved.				
	Name of Tester:	Joseph Wurz		Date:	11/19/2019	
				Time:	1:11PM	

Step	Description	Expected Results	Pass	Fail	N/A	Defect/Comments
1	Open Canvas Applicaton	Application Loads and displays landing page	X			
2	Select "Find My School"	"Find your school" user input field displays	X			
3	Type the School name in the input field and choose your school from the list	Your selected school login page is displayed			X	First try it did not load and had to go back to try again.
4	Log-in using your school credentials	Successful login/Student's dashboard is displayed	X			
5	On the dashboard tab select a course you are enrolled in	The course's homepage is displayed	X			
6	Choose the "Grades" option from the courses' landing page	Page loads displaying grades for the semester	X			
7	Uncheck the box "Base on graded assignments"	Check mark is removed and percentage under "total" changes to display the would-be grade based on all semester assignments	X			
8	Check and uncheck the "Show What-If Score" box quickly to see if app can handle rapid user input	It should toggle back and forth between views of your actual grade and allowing the user to input what-if grades.	X			
9	Press the back arrow to navigate back to course homepage	The course homepage should be displayed again	X			
10	Press Grades option again and then press the back arrow quickly before the page has finished loading.	The grades page should begin loading but then stop and return to course home page.	X			Seems to have worked fine but a message is displayed saying "An unexpected error occurred."
11	Exit out of application and then open it again	The application should close and boot up again gracefully	X
